ABOUT AGSB-CCE

The Ateneo Graduate School of Business - Center for Continuing Education (AGSB-CCE) was established to complement the existing Ateneo-BAP Institute of Banking, a consortium between the Ateneo de Manila University and the Bankers Association of the Philippines. It was initially known as the Basic Leadership Program (BLP) until the name was changed to Continuing Professional Education (CPE) and then finally, to Center for Continuing Education (CCE).

Under AGSB, CCE takes an active role in addressing specific industry concerns that require immediate, purposeful, and focused response. As an industry resource and partner, CCE offers continuing professional development programs that are workplace-based with immediate take-away value. Methodologies are based on business simulation, practical exercises and applications, case analyses, and focused discussions. Courses are designed, developed and delivered by industry practitioners who are noted experts in their respective fields. Together, AGSB and CCE support the Ateneo mission to promote excellence, integrity and service.
WHO SHOULD ATTEND?

Logistics, Warehouse, Transport Managers/Supervisors, and Supply Management professionals.

OBJECTIVES

Successful completion of this module enables the participant to:

- Learn the concept of logistics and its relationship to Supply Chain Management;
- Know the Warehouse and Distribution function;
  - Concept of flow
  - Proper facilities layout
  - 7S of Warehousing
  - Yard Management
  - Transport types and functions
  - Third party logistics, its pros and cons
  - New logistics technologies
- Understand logistics cost, its impact, the importance of strategy and planning to achieve an effective execution and efficient logistics operation; and
- Understand how logistics principles, processes, structure and technology can be synthesized to achieve superior logistics and supply chain performance.
The Logistics: The Management of Flow will provide you with a good understanding of the Logistics function and how it relates to the concept of Supply Chain Management. This online program will discuss the essential elements in the practice of Logistics, the Warehouse and Distribution Management functions. This program will also discuss the appropriate logistics design and best strategy suited to achieve the most cost effective and timely means in meeting customer satisfaction.
